

Industry specialist in chemical cleaning and in the development of mobile treatment units is looking for a **Junior Project Manager based near Manchester**. After initial training, you will work in support to the country manager and the export manager for small to medium sized projects in the UK and the EMEA countries. The role requires travelling about 30% of the time, mainly in the UK, Europe and Middle East region from time to time.

**ROLE:**

- Working with our client, you will prepare, plan and follow-up projects including planning work force and supplies as well as checking mobile units, suppliers and outsourced staff using company's internal support
- Writing technical offers and following up with local teams
- Visiting sites to gather information to propose technical offers
- Making sure that the projects are compliant with company's standards (ISO/Achille)
- Liaising with direct manager for reporting, follow-up, cost control and management of projects
- Liaising with various background clients

**PROFILE:**

- Fluent English, intermediate or Fluent French
- Educated to degree level in environment, water treatment, chemistry, or similar
- Previous experience (between 2 and 5 years) in project management, ideally in water treatment, or chemical cleaning or industrial maintenance
- Strong IT skills
- Very good communication skills with business acumen
- ability to work in a team, and open to different cultures will be assets for the role
- Initiatives, time management as well as problem solving skills will be key to this role
- Clean driving licence

**SALARY**

- Between 30k and 38k£ according to skills and experience
- Car Allowance
