

Fast growing French company specialising in digital transformation and engineering is looking to recruit a **GIS/Fibre Operative** for a long term project in the Glasgow, and greater Glasgow area. Using a GIS (Geographic Information System) system, you will collect and store geographical data to be used for the installation of the fibre by a telecommunication provider. You will work alongside another operative and the role can develop towards a technician or team leader role.

Full training will be given

**ROLE:**

- Walking around a definite area according to map
- Taking pictures of telephone posts and letter boxes following precise instructions
- Going down street chambers where telecom wires are stored
- Inputting data into a GIS system
- Explaining to inhabitants the purpose of your work when necessary
- Liaising and reporting with the Country Director based in London

**PROFILE:**

- Must be living in Glasgow or its area
- Computer literate, good understanding of Excel
- Understanding or knowledge of GIS would be a plus
- Must like working outside and working in a team and have good communication skills
- The role requires lots of walking and ability to go down narrow access with a ladder, so a certain level of fitness will be an asset
- Conscientious, eye for details, and willing to learn new skills
- Clean UK driving licence

**SALARY & BENEFITS:**

- Basic salary between £20k and £24k according to skills and experience plus bonus
- Medical insurance and pension
